Place graphic over the front of the frame.

Begin inserting SE's beading at each corner.

Insert the silicone beading with the fabric folded over. The silicone beading should not be exposed.

Using your fingers, push both fabric and silicone beading completely into the extrusions channel.

Continue to push in the remaining silicone beading on each side.

Check the perimeter of the frame for any excess beading that hasn't been pushed in. Graphic should be taut.
